Why we stress on more than of 50 question tests?

Putting 100 such questions on a single day, you won't be able to put the same energy continuously for 100 questions (if it is full length paper, it can be possible). And believe me, what you see in markets, every Test Paper of 100 marks, you will hardly find 25-30 good questions, because **their aim is QUANTITY, NOT QUALITY**. We will ask you 50, but its impact on your performance will be much greater than Paper consisting of 100 Questions.

Secondly, **when your exam is near, it is good to revise good, important and tricky questions rather than going through simple and irrelevant questions**. 50 Questions based Test Paper will be easy to revise, will give you confidence. 100 Questions Paper, neither you revise, nor you get time in the end to see again.

Thirdly, **if students are relatively new in the preparation, it is very difficult for them to practice 100 questions in one go**. It takes time for them to settle and that's why here, they will get the best option to survive here and win the battle.
