

Schedule for “Prelims Booster Series” starting from 15th Feb, 2026.

Important note:

Abhishek sir here. This is going to be very productive and important series for all students writing UPSC Prelims 2026.

I am doing this Prelims training for last 10 years for all students who are not able to qualify Prelims and for all writing prelims for the first time. **This small series will cover all your important topics for last one year.**

We are going to make you learn topic in the form of questions. Giving you notes is easy. But framing questions is very difficult if you are framing at par with UPSC level.

This is only for the students not enrolled in any of our previous courses. You can complete this series and get maximum benefit out of it.

Whenever you join this course, it will start from Day 1 for you. So, don't worry if you join late. (starting from 15th FEB)

5 Topics daily series (200+ important topics for Prelims)

A separate Telegram group will be formed for this course. You will be provided 5 topics daily with questions based on these topics in PDF format. You have to solve them daily. We will cover all important topics for Prelims 2026.

Sources:

- a. PIB from June 1, 2025 till April.
- b. The Hindu, special focus on Science and Environment section.
- c. Will refer to other Test Series for important and good questions (our priority will be to give you all possible questions, be it from anywhere)
- d. Other important magazines and environment websites.
